## Assignment 2:

Daily Standup Simulation - Write a script for a Daily Standup meeting for a development team working on the software feature from Assignment 1. Address a common challenge and incorporate a solution into the communication flow.

## **Daily Standup Meeting Script**

[Team gathers around for the Daily Standup meeting. The Scrum Master leads the meeting.]

**Scrum Master (SM):** Good morning, team! Let's kick off our Daily Standup meeting. As a reminder, this is a time for us to sync up, discuss progress, and address any blockers. Who would like to start?

**Developer 1 (D1):** I can start. Yesterday, I worked on implementing user authentication, and I've made good progress. However, I encountered a challenge with integrating it smoothly with our existing system.

**SM:** Thank you, D1. Integration challenges are common. Let's discuss that further during our meeting. Next?

**Developer 2 (D2):** I focused on developing the movie search feature yesterday. It's almost ready for testing, but I noticed some performance issues during high traffic scenarios.

**SM:** Noted, D2. Performance optimization will be crucial. We'll prioritize addressing that. Anyone else?

**Developer 3 (D3):** I tackled the booking confirmation functionality. It's working well, but there are some UI inconsistencies that need refining.

**SM:** Understood, D3. We'll ensure a consistent user experience. Any blockers or impediments that need immediate attention?

**D1:** The integration issue I mentioned earlier is my main blocker right now. I'll need some support from the backend team to resolve it.

**SM:** Alright, D1. Let's coordinate with the backend team to overcome this hurdle promptly. Anything else?

**D2:** I'd appreciate some guidance on optimizing database queries for better performance in the movie search feature.

**SM:** Sure, D2. Let's schedule a discussion with our database expert to optimize those queries. Anything from you, D3?

**D3:** No blockers, but I'll continue refining the UI for booking confirmation based on feedback.

**SM:** Great. Thank you, everyone, for the updates and addressing challenges proactively. Let's collaborate closely to ensure we meet our sprint goals. Remember, communication and collaboration are key to our success. If anyone needs additional support or has ideas for improvement, feel free to reach out. Let's have a productive day!

Team: (In unison) Let's do it!

[The team disperses to work on their tasks, with plans in place to address the identified challenges.]
